

RABIN PUN

Full Stack Developer | React · Node.js · TypeScript · AWS

Reading, UK | 07861 496621 | rabin.pun88@gmail.com | linkedin.com/in/rabin-pun-4236a648/ | github.com/Rabin88 | rabinpun.co.uk

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years' commercial experience building and owning customer-facing web portals end-to-end — frontend, backend and database. Currently at Keyloop, where I lead development on a business-critical customer portal used across the automotive retail industry. Strong hands-on skills in React, Next.js, TypeScript, Node.js, PostgreSQL and AWS (Lambda, S3, Serverless Framework), with production experience delivering through GitHub Actions CI/CD. Experienced in modernising legacy systems — having re-platformed a legacy ExtJS portal to React + TypeScript and upgraded the build tooling to Vite. Early adopter of AI-assisted development tools such as Claude Code to boost productivity and code quality. Known for being the go-to technical contact for any production issues. **Actively seeking** a mid-to-senior Full Stack role where I can ship user-focused software at scale.

CORE SKILLS

Frontend

React, Next.js, TypeScript, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind, Material UI, Formik, Yup, React Query, React Hook Form + Zod, Vitest, React Testing Library

Cloud & DevOps

AWS (Lambda, S3, IAM, API Gateway), GitHub Actions CI/CD, SonarQube Cloud

Tools & Platforms

Git, GitHub, Salesforce Service Cloud, Jira, Confluence, Microsoft Azure

Practices

Agile/Scrum, code review, cross-team collaboration

Backend

Node.js, Express, REST APIs, TypeScript, Serverless Framework, AWS Lambda

Databases

PostgreSQL, MySQL, Oracle, SOQL

AI-Augmented Development

Claude Code, GitHub Copilot, OpenAI API

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan 2021 – Present

Keyloop, Hungerford, UK

- **Full stack ownership** — Own the end-to-end development of a business-critical customer portal (frontend, Node.js backend and PostgreSQL database) used by automotive dealerships across the UK, Europe and Asia.
- **Modernised legacy** — Led the migration of a legacy ExtJS portal to a modern React + TypeScript stack, later upgrading the build tooling from Create React App to Vite — reducing technical debt and significantly improving build and page-load performance.
- **Delivered on AWS** — Maintained serverless AWS microservices using AWS Lambda, S3 and the Serverless Framework, with secure file upload/download via pre-signed URLs.
- **Built CI/CD** — and maintained CI/CD pipelines in GitHub Actions, automating build, test, SonarQube quality gates and deployment to AWS.
- **Feature delivery** — Deliver new features from discovery to production, working directly with product owners and business analyst, and third-party providers to integrate their services into the portal.

- **Go-to engineer** — For production issues, providing L3 technical support and acting as the technical point of contact.
- **AI-augmented delivery** — Leverage AI-assisted development tools such as Claude Code in my daily workflow to increase productivity, improve code quality through faster reviews and refactoring, and accelerate debugging and root-cause analysis of complex issues.
- **Frontend quality** — Reusable React component patterns with Material UI and React Query, Formik Form + Yup validation, improving developer velocity across the team.

Graduate Software Engineer
Tata Consultancy Services (TCS)

Dec 2019 – Nov 2020

- Developed client- and server-side features in JavaScript and integrated with ServiceNow APIs for enterprise workflow automation.

EDUCATION

MSc Computer Science
University of Birmingham, UK
Sept 2018 – Sept 2019 | Merit

BSc Nutrition
Oxford Brookes University, UK
Sept 2011 – Jun 2014 | Upper Second Class (2:1)

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)
