

RABIN PUN

Full Stack Developer | React · Node.js · TypeScript · AWS

Reading, UK | 07861 496621 | rabin.pun88@gmail.com | linkedin.com/in/rabin-pun-4236a648/ | github.com/Rabin88 | rabinpun.co.uk

SUMMARY

Full Stack Developer with 5+ years' experience building and owning customer-facing web portals end-to-end. Currently lead development of a business-critical portal at Keyloop, serving the automotive retail industry across the UK, Europe and Asia. Skilled in React, Next.js, TypeScript, Node.js, PostgreSQL and AWS, with a strong track record modernising legacy systems and driving CI/CD delivery. **Actively seeking** a mid-to-senior Full Stack role to ship user-focused software at scale.

CORE SKILLS

Frontend

React, Next.js, TypeScript, Vite, JavaScript, HTML5, CSS3, Tailwind, Material UI, Formik, Yup, React Query, React Hook Form + Zod, Vitest, React Testing Library

Cloud & DevOps

AWS (Lambda, S3, IAM, API Gateway), GitHub Actions CI/CD, SonarQube Cloud

Tools & Platforms

Git, GitHub, Salesforce Service Cloud, Jira, Confluence, Microsoft Azure

Practices

Agile/Scrum, code review, cross-team collaboration

Backend

Node.js, Express, REST APIs, TypeScript, Serverless Framework, AWS Lambda, OAuth, JWT, SSO

Databases

PostgreSQL, MySQL, Oracle, Knex.js

AI Development Tools

Claude Code, GitHub Copilot, Microsoft 365 Copilot, OpenAI API

WORK EXPERIENCE

Full Stack Developer

Jan 2021 – Present

Keyloop, Reading, UK

- **Full stack ownership** — Own end-to-end delivery of a business-critical customer portal — frontend, Node.js backend and PostgreSQL database — used by automotive dealerships across the UK, Europe and Asia.
- **Modernised legacy** — Led the re-platforming of a legacy ExtJS portal to React + TypeScript and migrated build tooling from Create React App to Vite, cutting technical debt and significantly improving build and page-load performance.
- **CI/CD** — Own the GitHub Actions workflows automating build, test, SonarQube quality gates and deployment for the frontend and backend, escalating to the DevOps team for underlying AWS infrastructure issues.
- **File storage** — Implemented secure file upload and download in the portal using AWS S3 with pre-signed URLs.

- **Feature delivery** — Partner directly with product owners, business analysts and third-party providers to take features from discovery through to production.
- **Salesforce integration** — Built and maintained REST API integrations between the portal and Salesforce Service Cloud to support real-time data exchange with the CRM platform.
- **Coveo integration** — Integrated Coveo's AI-powered search into the portal to surface relevant knowledge articles at the point of need, deflecting case creation and driving self-service adoption.
- **Technical leadership** — Primary technical point of contact for production issues, providing L3 support and driving root-cause resolution.
- **AI-augmented workflow** — Use Claude Code and other AI tools daily to speed up code review, refactoring and debugging, raising overall delivery velocity.
- **Frontend engineering** — Established reusable React component patterns (Material UI, React Query, Formik + Yup) that improved consistency and developer velocity across the team.

Software Engineer -

Dec 2019 – Nov 2020

Tata Consultancy Services (TCS), London

- **ServiceNow development** — Performed advanced ServiceNow configuration using JavaScript to implement client- and server-side features, integrating with ServiceNow APIs to automate enterprise workflows.
- **Customer support** — Resolved customer support issues within SLA, ensuring timely fixes and minimal disruption to business operations.
- **Stakeholder collaboration** — Worked closely with product owners and business analysts to align technical delivery with business priorities.
- **Requirements gathering** — Gathered business requirements from stakeholders and translated them into implemented platform features.

EDUCATION

MSc Computer Science

University of Birmingham, UK
Sept 2018 – Sept 2019 | Merit

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)
